

Arbovirus Surveillance Program
Massachusetts Department of Public Health
Infectious Diseases Laboratory Division
State Laboratory Institute

Date: June 23, 2000

Mosquito trapping continued at sixteen regular long-term sites in Plymouth, Bristol, Norfolk, Middlesex and eastern Worcester Counties. Collections trapped on June 18th were below average due to cool and wet weather conditions. Sites in Boston, Northampton, Springfield, and Greenfield were also trapped with CDC-light and gravid traps. A total of 179 mosquito pools have been tested, and all were negative.

To date, 10 dead birds have been tested and all were negative for virus.

Weekly arbovirus reports and informational material on WNV and eastern equine encephalitis (EEE) virus can be accessed at <http://www.state.ma.us/dph>.

Total number of mosquitoes analyzed to date: 1700 Total number of virus isolates identified: 0
